CAREER SUMMARY

Full-stack Web Developer with 6+ years of experience specializing in Ruby on Rails, JavaScript, and modern backend technologies. Strong expertise in building scalable, high-performance applications, optimizing database queries, and managing cloud infrastructure on AWS and DigitalOcean. Experienced in leading development cycles, implementing automated deployments, and collaborating with cross-functional teams to deliver robust products. Fast learner with a solid track record of solving complex technical problems and adapting quickly to new technologies.

SKILLS

Backend: Ruby, Ruby on Rails, Node.js

Frontend: JavaScript, Next.js, jQuery

Database: PostgreSQL, MySQL, Prisma

DevOps: AWS, EC2, S3, DigitalOcean, Nginx, Capistrano

Tools: Git, Docker, CI/CD

EXPERIENCE

Sr Software Engineer (Aug 2025 - Present) | Syftet Limited (Dhaka, Bangladesh)

- Led development of scalable full-stack systems using Ruby on Rails, PostgreSQL, Redis, and modern JavaScript frameworks, ensuring clean and maintainable codebases.
- Improved API and database performance by 30–45% through query optimization, indexing, and resolving N+1 issues.
- Managed cloud infrastructure on AWS/DigitalOcean, automating deployments with Nginx, Capistrano, and Puma for 60% faster CI/CD.

Software Engineer (July 2021 - Aug 2025) | Syftet Limited (Dhaka, Bangladesh)

- Built REST APIs, background jobs (Sidekiq), and data-intensive modules, including large Excel importers and third-party service integrations.
- Developed admin dashboards and web modules using Next.js, Express.js, and Prisma, ensuring smooth cross-team collaboration.
- Resolved complex production issues, upgraded Rails versions, and improved system stability across multiple client applications.

Jr Software Engineer (Aug 2020 - June 2021) | Misfit Technologies (Dhaka, Bangladesh)

- Developed and maintained REST APIs using Ruby on Rails, PostgreSQL, and Grape for scalable backend services.
- Implemented cron-based automation for SMS, notifications, and system tasks.
- Supported server deployment and CI/CD pipelines, collaborating with mobile and frontend teams.

Jr Software Engineer (Nov 2018 - July 2020) | Syftet Limited (Dhaka, Bangladesh)

- Built full-stack features using Ruby on Rails, HTML/CSS, Bootstrap, and jQuery for multiple client applications.
- Integrated Stripe payments, third-party APIs, and data-scraping scripts for enhanced automation.
- Managed cloud servers, automated deployments, and fixed UI/UX issues based on Figma designs.

ACADEMIC QUALIFICATION

BSc in Computer Science and Engineering | City University, Bangladesh

Passing Year: 2018, Result: 3.72

CLIENT PROJECTS

Cince

- Upgraded legacy Ruby on Rails application and fixed major design and functional issues across the project.
 - Improved performance by optimizing API endpoints, refactoring slow queries, and resolving production bugs.
 - Set up AWS EC2 infrastructure and implemented automated deployment using Capistrano and Nginx.
- Project Link: <https://cince.com.au>

DailyIslam (Admin Panel + Mobile App Backend)

- Developed full admin panel using Next.js and implemented backend APIs using Node.js, Express.js, Prisma, and PostgreSQL.
 - Created large-scale data import scripts, integrated Google Maps, and built multiple services for mobile applications.
 - Automated deployment pipelines on AWS EC2 and fixed complex issues in the existing system.
- Project Links: Admin – <http://diadmin.syftet.com> | App – Play Store: <https://tinyurl.com/dailyislam>

Trusteeze Application

- Implemented accounting features using Ruby on Rails and the Plutus gem for accurate financial management.
 - Collaborated with cross-functional teams to deliver new modules, fix bugs, and integrate third-party APIs.
 - Managed server infrastructure, automated deployments, and added dynamic document generation.
- Project Link: <https://trusteeze.co.za>

Lienexpos

- Fixed bugs and implemented new features using Rails, HTML/CSS, jQuery, and Bootstrap.
 - Developed APIs for the mobile app and configured backend server with automated deployments.
 - Improved site stability and performance through refactoring and optimized logic.
- Project Link: <https://www.lienexpos.com>

Welcome App

- Developed the entire application from scratch using Ruby on Rails with pixel-perfect UI implementation from Figma.
 - Created REST APIs for other web/mobile apps, and implemented scheduled jobs using cron.
 - Collaborated with frontend/mobile engineering teams to deliver a seamless user experience.
- Project Link: <https://mywelcomeapp.com>

IFarmer

- Integrated push notification systems and built a new internal CRM using Ruby on Rails.
 - Collaborated with mobile team for notification pipelines and data flow design.
 - Set up server infrastructure and deployed the CRM to production.
- Project Link: <https://www.ifarmer.asia>

PROFESSIONAL TRAINING

LICT Project By BCC – 300 Hours – Sep/2017

C# DotNet OOP, Windows Application, ASP.Net, ASP.Net MVC 4, Web API, MS SQL Server

SEIP Project From BASIS - 3 Month – July/2017

C#, OOP, ASP.Net MVC 4, MS SQL Server

EXTRACURRICULAR ACTIVITIES

Attending Programming Contest (ACM-ICPC, IUPC, IUCPC, and NCPC Online Contest), Solving Programming Problems (Uva, Uri, Lightoj), Photography, Tutorial Making, Attending programming seminars, Mentoring in CUPC.

Programming Contest

Asia Dhaka On-Site Regional Contest (The 2017 ACM-ICPC Asia Dhaka Regional Contest)

Intra University Programming Contest 2016 – City University (Position: 2nd)
